Deco & Plaza Insert Fires

Minimum Height above fascia to a Mantel Shelf with a Firenzo Double Shielded Deflector - 290mm.

Dimensions based on 40mm insulated floor protector height.

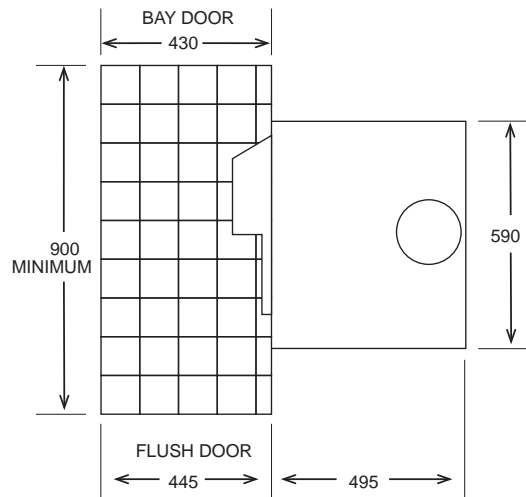

Athena & Forte Insert Fires

Deflector required if combustible mantel less than 500mm above fascia.

Measurements shown are for a 40mm high floor protector.

Athena, Forte, Plaza and Deco require an insulated floor protector to AS/NZS 2918:2001.

Refer to Installation Instructions.

Customer testimonials for insert fires

"The heater is a high quality product."

G.F.D, Dunedin

"Works great. Design is fantastic with large glass door and room for big logs."

M.D, Drury

"We are very happy with the look and the heat output."

G & A C, Temuka

"Perfect, brilliant design, excellent fire."

G & L I, Morrinsville

"It looks striking and is the subject of much favourable comment and it burns well!"

R & P K, Nelson

"Very pleased with the heat output and efficiency. We would recommend a Firenzo fire to others."

R & H H, Papatoetoe

"I am impressed with the quality of the product."

T.R.S, Taumarunui

"It's absolutely wonderful (after using a gas fire for years)."

H.G.M, Ashhurst

"Very pleased with this woodfire, needs very little wood. Classic design."

W.V.L, Takanini

"Very pleased with our purchase. Looks great. Heat output is excellent."

S.M.T, Levin

"It's just great - really enjoying the extra warmth."

A.D, Napier

"Good heat output too. Athena Bay looks great in an historic colonial house."

J.M.G, Wanganui

A built-in-fire canopy is required if the fire is not being installed into a masonry fireplace.

Refer to the owners manual for complete installation instructions and ensure compliance with building codes and regulations.

The product dimensions and specifications in this brochure apply at the date of print.
